

# SurgiCube

It's all in the Cube

SurgiCube® is worldwide patented.

[SurgiCube.com](http://SurgiCube.com)

# SurgiCube

## Downflow as it's meant to be

The SurgiCube provides an ongoing, effective laminar down flow over the surgical area and the instrument tables. The flow passes no contamination sources. It's blown directly on the operating area. Ultraclean air, where you need it.

# SurgiCube

## Patient comfort

The accessibility of the SurgiCube keeps patients satisfied. The pre-operation procedure is much quicker and, in addition, the patients can wear their own clothes. Therefore

the operating experience is more like a treatment, resulting in less stress.

## Location independent

The SurgiCube can be set up in one day in any domestically cleaned

draft-free room. After a validation the day following set up, the SurgiCube is operational.

# SurgiCube

## For all micro-surgical operations

The SurgiCube can be applied to all types of small surface surgeries such as plastic surgery, ENT-surgery, eye surgery, and orthopaedic surgeries

as knee, ankle and wrist operations. The unit is also very suitable for training purposes.

day in any domestically cleaned draft-free room. After a validation the day following set up, the SurgiCube is operational.

## Location independent

The SurgiCube can be set up in one
